We give great care to have all Nursery Stock true to name. However, should our stock prove untrue to name, we shall not be liable for any sum greater than original sum paid us. OKI NURSERY gives no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds or plants they sell; and they will not be in any way responsible for the crop.

We accept all orders upon condition that they shall be void should frost, storm, crop failure or other cause result in injury or destruction of stock, or in inability to deliver. If the purchaser does not accept the goods on these terms, they are to be returned at once.

NOW, 30 VARIETIES OF FOUR WINDS TRUE DWARF CITRUS

Oranges

Robertson Navel — Best selling variety. Early and heavy bearing. Patented Cultivar of Washington Navel.

Washington Navel — California's famous winter ripening variety. Volume seller. Fruit ripens in 10 months.

Summernavel — The patented navel that ripens in the summer. Larger leaved. Ideal for espaliering.

Shamoudi — From Palestine. On Four Winds dwarfing rootstock makes especially attractive tree. Mid-winter ripening.

Temple — Probably a tangerine orange hybrid (a Tangor) increasing in demand. Early spring ripening.

Trovita — A nucellar introduction by Dr. Frost of Citrus Experiment Station. Spring ripening. Good cool areas.

Valencia — The volume selling summer ripening orange. 15 months to ripen. Grow your own orange juice.

Seedless Valencia — Patented seedless cultivar of the Valencia. Excellent foliage and fruit.

Tarocco — Italy's best strain of red juice (blood) orange. Sweet in cool areas. Good espalier type.

Tangerine — Mandarin Oranges

Kinnow — A Dr. Frost King X Willow Leaf hybrid. Beautiful foliage. Spring ripened fruit lasts for months.

King — Fruit quite large, bumpy loose skin. Best in areas with less intense sun. Late spring ripening.

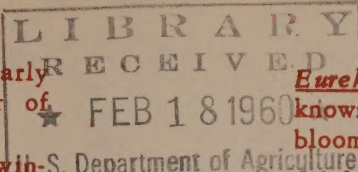

Kara — Another Dr. Frost hybrid, King X Satsuma. Fruit larger, tree more open than Kinnow. March — June.

Dancy — The best known Mandarin type. On fruit stands at Christmas time.

Dweet — A Tangerine-orange hybrid by Dr. Frost — Dancy X Mediterranean Sweet. Large, very juicy fruit. Spring ripening.

Owari Satsuma — Dr. Frost's nucellar strain. Earliest ripening — November, December in Sacramento and San Joaquin Valleys.

Clementine (Algerian) Mandarin — Excellent. Ripens about month after Satsuma. Increasing in popularity.

Lemons

Eureka — Virus free nucellar cultivar. Best known, largest selling lemon variety. Fruit, bloom year around.

Lisbon — Tree for tree produces the largest crop of best "Sunkist" or "Pure Gold" quality. Hardier than Eureka. Good espalier.

Meyer — Quick decline virus free S3E5 clone. True Dwarf only on Four Winds dwarfing rootstock, not cuttings. Looks best in mid-winter.

Ponderosa — Much wanted for its huge fruit, its large fragrant bloom, its distinctive leaf.

Grapefruit

Marsh Seedless — Best commercial variety. An especially beautiful tree. Good espalier type.

Ruby Pink — The increasingly popular pink fleshed sport of Marsh Seedless.

Limes

Bearss Seedless — True lime of Tahiti type. Fruit larger than Mexican lime. Good in cool areas. Year round.

Mexican — Thornless clone. True lime, less hardy than Bearss. Fruit year round, more or less.

Rangpur — Not a lime (a sour Mandarin). Dwarf only if on Four Winds dwarfing rootstock. Orange colored fruit at Christmas.

Tangelos

Minneola — Hybrid of Tangerine X Grapefruit. Excellent Tangerine-like orange colored fruit in the spring.

Sampson — Another Grapefruit X Tangerine hybrid. Tree very attractive. Yellow fruit late spring. Good along the Coast.

Kumquats

Nagami Kumquat — Olive sized and shaped, bright orange fruit, produces best in warmer areas. Late spring ripening.

Eustis Limequat — A Lime X Kumquat hybrid. Prolific bearing most all areas. Trees Erratic branching. Year around.

Calamondin — Quite hardy, highly decorative, columnar tree. Fruit like small acid Tangerines, store well on tree.

Growing Suggestions

Rootstock — Four Winds true dwarf citrus are grafted on dwarfing rootstocks. Know where the union is. Remove any growth below it.

Tree Size — When mature, trees will be globular in shape, about 8 feet tall and wide.

Hardiness — Between varieties there is less difference than is the difference possible between locations of tree in yard.

Pruning — None required. Pinch or prune any time as you wish.

Fertilizing — Feed regularly, before watering. Nitrogen main requirement.

Planting — Avoid lawn areas. Give wind, draft free location. Provide good drainage. In cooler areas, plant in a hot pocket facing south. Obtain added heat from walls, surfaced areas. Raised beds provide warmer roots. Plant in boxes, mobile, for patio pleasure.

Water — Only when tree needs it. Water slowly, deeply.

Mulch — and water less often, do less weeding.

Pest Control — For Ants - chlordane. For Snails - poison bait. For General Control of scales, thrip, red spider, aphids - spray with malathion.
